CITIZEN PERSPECTIVE
2021 Citizen Survey

May 2021
presented by: Prairie Research Associates
Background and Objectives

Project Background

- Historically this study has been used as a tool for measuring the level of satisfaction of the citizen’s of Winnipeg.
- The City of Winnipeg has conducted this study annually since 2001.

Project Objectives

1. Determine Winnipeg citizen’s levels of satisfaction regarding their city
2. Determine Winnipeg citizen’s current needs in their city
   - Gauge how those needs have changed and where they are heading
     - e.g. Are specific issues trending downward or emerging?

COVID-19 adjustments

- Where relevant, question wording was adjusted to reflect the pandemic and ask participants to reflect on their typical behaviour.
- Responses that may have been impacted by COVID-19 are identified where applicable.
Methodology

A total of 600 Winnipeg citizens aged 18 years and over were interviewed by telephone between April 28 to May 18, 2021. The sample include both landlines and cell phone numbers. The final results in this survey are weighted by age, gender, and the area of Winnipeg respondents reside in according to 2016 Statistics Canada census data.

The margin-of-error for this telephone survey of 600 adults is +/- 4.1%, 19 times out of 20. The margin-of-error is higher for sub-populations analyzed in these results.

Where applicable, this report compares the results of the 2021 survey with the results of previous citizen satisfaction surveys conducted in 2017 to 2020.

Notes:
• Data presented is based on people who answered the survey questions (excludes “don’t know/refused” response).
• The percentages shown in this report may not add up to exactly 100%, due to rounding.
• Values less than 3% may not be shown in charts.
The majority of respondents are under 55 years old and nearly three-quarters are home owners.
