### **PART E – SPECIFICATIONS**

- Add: E3.2 Work will typically be on conventional retention ponds within residential neighbourhoods with access for equipment to the edge of the water. The locations are based on vegetation growth.
- Revise: E4.1 to read An estimated six (6) – eight (8) retention ponds of approximately 20–25 hectares in total are expected to be harvested annually. **The estimated quantities are based on reasonable estimates from the previous four (4) years but can vary based on vegetation growth.**
