### **PART E – SPECIFICATIONS**

- Revise: E1.6(a) to read: Sewer Rehabilitation by CIPP methods are to be A3 sized plan view only drawings at a scale of 1:500, developed using GIS base drawings including existing utilities, major features, properties, road width, and field survey information (manhole rim and invert elevations). Each repair drawing plan is to show upstream and downstream manholes, distance to nearest manhole, length of repair, manhole and sewer asset numbers (from the City's database), manhole rim and invert elevations, details of connection to existing pipe, and any other applicable notes.
- Revise: E2.1(a) to read: The Project Manager shall have demonstrated experience in the design and contract administration of sewer rehabilitation and in particular rehabilitation by CIPP lining methods and City of Winnipeg Contract Administration procedures.
- Revise: E3.2(a) to read: The preliminary record drawing submission is to consist of a drawing transmittal letter to the Supervisor of Drafting, copied to the Department's Project Manager, and one (1) complete set of 11" x 17" (A3) drawing prints for the Sewer Renewals.
- Revise: E3.2(c) to read: The reviewed record drawings will be returned with comments (if any) for completion. Once all required revisions have been made, submit one (1) complete set of 11" x 17" (A3) drawings for the Sewer Renewals, complete with the preliminary drawing prints, with comments one set of GIS Drawings, and the digital file (CAD and PDF) for each Record drawing to the Department's Supervisor of Drafting. The digital drawing file name must be the Water and Waste Department drawing number assigned to that drawing.
