E2. SOILS INVESTIGATION REPORT

- E2.1 Further to C3.1, a geotechnical report for the Ness Avenue Street Rehabilitation Project titled “2007 Regional and Residential Streets Program” was prepared by National Testing Labs and is appended to this document in Appendix A.

GENERAL REQUIREMENTS

E3. NESS AVENUE WATERMAIN RENEWAL

- E3.1 The water supply for the St. James Civic Centre and Assiniboine Golf Club is looped within the limits of this watermain renewal. The Contractor shall complete the watermain renewal without inconveniencing either of these establishments. Any water shut downs shall be made only after making arrangements at both locations.

E4. SURFACE RESTORATIONS

E4.1 Pavement Areas

- (a) Ness Avenue, within the Road Works limits as shown on the drawings, shall be temporarily restored as follows:
 - (i) Asphalt and concrete pavements shall be backfilled with Class 3 and temporarily restored as follows: minimum 50 mm thick layer of Type II Asphaltic Concrete as specified in CW 3410;
 - (ii) Sidewalk shall be backfilled with Class 3 and temporarily restored as follows: minimum 50mm thick layer of cold mix asphalt or cement stabilized fill.
 - (iii) Maintain temporary surface restorations until the Contractor of Bid Opportunity Number 396-2008 takes control of the Site.
 - (iv) If temporarily restored pavements are not maintained within 24 hours of being notified to do so, the Work may be directed to be completed by the City forces and the cost deducted from future payments to the Contractor.
- (b) Ness Avenue outside the Road Works limits as shown on the drawings shall be permanently restored in accordance with the City of Winnipeg Standard Construction Specifications.

E4.2 Measurement and Payment

- E4.2.1 Costs for temporary pavement and sidewalk restorations including removal, and maintenance will be included with the watermain installations.

E5. EXCAVATION AND BACKFILL

E5.1 Disposal of unsuitable or surplus excavated material

- (a) If the Contractor has not arranged for an approved disposal site, the City shall provide an optional disposal site for all surplus clean clay from the construction site. The material is not to include any refuse, concrete, metals, wood, organics, construction waste or any other deleterious materials. Any surplus soil material not meeting these requirements shall not be considered clean clay and shall not be permitted.
- (b) The disposal location provided by the City will be at the Summit Road Landfill Site. The Contract Administrator will make arrangements with Colin Potter (986-4463) at the landfill site for the disposal of the surplus soil material.
- (c) There will be no tipping fees charged at the landfill site to the Contractor for the disposal of surplus soil material meeting the requirements of clean clay as specified.
- (d) Surplus material not meeting the requirements of clean clay may be disposed of at the Brady Road Landfill Site although tipping fees will be charged.
- (e) There shall be no measurement of surplus soil material disposed of at any disposal site. No additional payment will be made for disposal of surplus soil materials. It shall be considered incidental to the cost of the Work.

E6. PROTECTION OF EXISTING TREES

- E6.1 The Contractor shall take the following precautionary steps to avoid damage from his construction activities to existing boulevard trees within and adjacent to the limits of the construction area:
- (a) Do not stockpile materials and soil or park vehicles and equipment on boulevards within 2 metres of any tree.
 - (b) Strap mature tree trunks with 25 x 150 x 2400 wood planks. Smaller trees shall be similarly protected using appropriately sized planks.
 - (c) Excavations shall be carried out in a manner to minimize damage to existing root systems. Where roots must be cut to facilitate an excavation they shall be neatly pruned at the face of the excavation.
 - (d) Work on site shall be carried out in a manner to minimize damage to existing tree branches. Where damage to tree branches does occur, the Contractor shall neatly prune the damaged branch.
- E6.1.2 American Elm trees shall not be pruned between April 1st and August 1st and Siberian Elm trees between April 1st and July 1st of any year under the provisions of The Dutch Elm Disease Act.
- E6.2 All damage to existing trees due to the Contractor's construction activities shall be repaired to the requirements and satisfaction of the City of Winnipeg, Public Works Department, Forestry Branch.
- E6.3 No separate measurement or payment will be made for protection of trees.

E7. SUSPENSION OF WORK ACTIVITIES WHEN SEWER CONTROL GATES ARE ACTIVATED DURING PERIODS OF HIGH RIVER LEVELS

- E7.1 The Contractor is advised that as the elevation of the Red and Assiniboine Rivers rise from the normal winter or summer levels due to spring runoff or periods of heavy rainfall the City is required to close various control gates located on sewer system outfalls. Similarly, as the elevation of the rivers drop to normal levels, the City is required to open the control gates that have been closed. Control gates begin to be closed when river levels reach elevation 224.51 (James Avenue 9.0). As well, higher river levels can cause the level of flow in sewers can be higher than normal.
- E7.2 In the event the Red and Assiniboine Rivers rise to an elevation where the City has to begin closing control gates, the Contract Administrator will direct that work activities in any sewers affected by the gate closure be suspended and the risk of runoff causing flooding in the sewer evaluated. Work will continue to be suspended as long as there is a risk of the sewer being flooded while the control gate is closed unless the Contractor provides flow control measures approved jointly by the Contract Administrator, City of Winnipeg Collection System and Flood Control Branch and Local Services Branch.
- E7.3 Similarly, as river elevations drop and the City has to open control gates that have been closed, the Contract Administrator will direct that work activities in any sewers affected by the control gate opening be suspended due to the risk of the river flooding the sewer once the gate is opened. Work will continue to be suspended as long as the sewer is being flooded from the river unless the Contractor provides flow control measures approved jointly by the Contract Administrator, City of Winnipeg Collection System and Flood Control Branch and Local Services Branch.
- E7.4 The Contractor will have no claim for extra work or compensation as a result of suspension of work due to the City closing and opening control gates during periods of rising and dropping river levels. If in the opinion of the Contract Administrator the suspension will cause the completion of the Work to occur after the specified date for Critical Stages or Substantial Performance and the Contractor's schedule would have reasonably permitted completion of the

Work before the required date, the date for Critical Stages or Substantial Performance will be adjusted accordingly.

E8. PROVISIONAL ITEMS

- E8.1 The Provisional Items listed in the Schedule of Prices are a part of the Contract.
- E8.2 The Contractor shall not perform Work included in the Provisional Items without prior authorization from the Contract Administrator. All Work included in the Provisional Items will be carried out within the construction areas shown on the Drawings.
- E8.3 Notwithstanding GC:7, the City reserves the right to diminish all or any portion of the Items of Work listed in the Provisional Items and no claim shall be made for damages on grounds of loss of anticipated profit or for any other reason.
