B2. BACKGROUND

B2.1 On December 14, 2016, Council approved a report submitted by Transit titled Expansion of Transit Vehicle Overhaul and Maintenance Facilities authorizing the project to be included in the 2017 capital budget.

B2.2 The report identified that Transit’s operations are housed at three primary locations in a total of four buildings as follows:

(a) The Fort Rouge Garage ("FRG"), located at 421 Osborne Street consists of two major buildings totaling 480,000 sq. ft. These buildings were constructed in 1968 with a bus parking addition constructed in 1978. FRG houses Transit’s primary administrative offices, vehicle overhaul and maintenance facilities, bus parking and daily servicing facilities, support facilities and has a parking capacity for 420 buses.

(b) Brandon Garage ("BG") is located at 600 Brandon Avenue and is adjacent to FRG, is 135,000 sq. ft. in size and was constructed in 2014. BG is a parking and servicing facility with dispatch offices and has a capacity of 153 buses.

(c) North Garage ("NG"), located at 1520 Main Street, is 100,000 sq. ft. in size and was constructed in two stages, between the late 1930s and the mid-1950s. The NG is a parking, servicing, and light maintenance garage with dispatch offices and has a capacity of 135 buses.
B2.3 A 2009 external consulting report concluded that the facilities were being operated at capacity and that space deficiencies existed in bus parking, bus maintenance and operations support areas. It further concluded that substantial facility upgrades and updates were required at FRG and NG to ensure continued long term operation and to meet projected service growth requirements. As partial response to this report, the BG facility was constructed and increased bus storage capacity until the replacement of NG could occur.

B2.4 In 2015, a second external study was completed examining the replacement options for NG with the view to increase the long-term capacity to store and maintain a bus fleet of 750 buses.

B2.5 On January 8, 2019, Standing Policy Committee on Infrastructure Renewal and Public Works approved a report titled, Outline of Steps Toward the Large Scale Deployment of Electric Buses, and the creation of a detailed study to provide Class 3 cost estimates for the purchase of 12-20 battery-electric buses and associated charging infrastructure be referred to the 2019 Budget.

B2.6 The report identified that the establishment of a test fleet of 12-20 battery-electric buses will allow for some key things to occur in anticipation of a wider adoption of electric buses including construction of a Maintenance and Storage facility for a larger electric bus fleet.

B2.7 The test would also allow Winnipeg Transit to become more familiar with the operation, maintenance, and planning required for electric buses and allow for plans to be finalized for the replacement of North Garage. The proposed garage is currently being designed and costed as part of the Eastern Corridor Study.

B2.8 On November 27, 2019, the City released the Winnipeg Infrastructure Plan outlining 10-year capital investment priorities and detailed plans prioritizing 45 proposed capital projects valued at $5 million or greater. The Infrastructure Plan presents a prioritized listing of capital investments that represent the most value to the City based on the cost benefit points ratio. The replacement of the North Transit Garage ranked as the City’s 7th highest priority.

B2.9 Transit Department needs will be addressed through construction of the new North Garage. The new garage will be designed and constructed in three phases to allow for future building expansion (Site Plans attached as Appendix A).

B2.10 The new North Garage will replace the existing garage located at 1520 Main Street, as the existing garage does not meet the current needs of Transit and the building itself is not adequately located to handle growth in the North end of the City.

B2.11 The City of Winnipeg has conducted due diligence of municipally-owned land that may be suitable for development of a new Transit Service North District Garage Site; however, the City is now desirous of receiving proposals from private land owners, detailing their options for suitable developable sites.
