How To Use the Winnipeg Building Permit Summary Statistics

This permit data is updated on a monthly basis. The statistics included in the accompanying tables are based on the building permits issued by the City of Winnipeg's Planning, Property & Development (PP&D) Department.

NUMBER OF PERMITS ISSUED

Permit counts include all permits issued. In many cases, more than one type of permit must be issued for the same building or project. For example, in the case of a new commercial or multi-unit residential building, there may be three permits issued (one related to the foundation, one for the structural framing, and another for the superstructure).

VALUES

The "values" included in all tables are expressed in thousands of dollars and are based on construction value estimates as declared by permit applicants.

DWELLING UNITS

In the "Construction of Dwelling Units" table, dwelling unit counts are based on permits issued by the Planning, Property & Development Department. This is not

the same as housing starts. Housing starts statistics published by Canada Mortgage and Housing are based on physical construction activity as observed by that agency. In the case of multi-unit residential projects involving partial permits, the dwelling units are not counted until the last major permit (usually the superstructure permit) has been issued.
