#### **Adult Nuisance Mosquito Fogging Program Suspended**

**Winnipeg, MB** - The Public Works Department's Adult Nuisance Mosquito fogging program is suspended as of today, July 30, 2014, due to low mosquito activity. The city wide average adult mosquito trap count for today was 24. All quadrants are substantially below 100.

The current adult mosquito population is near the end of its life cycle. Larval surveillance indicates very low levels of mosquito larvae in standing water sites. No significant increase in adult mosquito activity is expected for the next two weeks.

Residual treatments are now being applied onto long grass, shrubs and bushes where higher adult mosquito activity is observed.

#### **Adulticiding Factor Analysis (AFA) Remains High**

All factors of the AFA, including trap counts, will continue to be monitored on a daily basis. The AFA remains at high.

The Insect Control Branch's extensive larviciding will continue.

#### **Buffer Zones**

Property owners not wanting insecticides applied on or adjacent to their principal residence may register as "Anti-Pesticide Registrants" for the Adult Nuisance Mosquito Control Program. Those who wish to register must provide identification that ties the registrant to the address being registered for a buffer zone. A photocopy or scanned document such as a driver's licence or a utility bill will suffice as acceptable identification proving primary residence. Please note: a 72-hour turnaround time is required.
