Forest tent caterpillar control program continues

Winnipeg, MB – Today, June 12, 2017 weather permitting, the City of Winnipeg’s Insect Control Branch will continue its forest tent caterpillar control program. In addition, the city is now treating for the cankerworm and elm spanworm.

Starting at **9:30 p.m. today, June 12, 2017** crews will continue treatment in **Insect Management Area 24 (Brockville, Buffalo, Chevrier, Linden Ridge, Lindenwoods, Pembina Strip, West Fort Garry Industrial)** and begin treatment in **40 (Kensington, Minto, Polo Park, St. Matthews, West Wolseley)**.

Spraying will not occur if there is significant rainfall or winds are greater than 20 km/hr.

Treatment will be conducted utilizing *Bacillus thuringiensis var. kurstaki* (Btk), a biological, organic product which is sprayed from high pressure tree sprayers directly onto the foliage of the trees located in City parks and on City boulevards. Once Btk is ingested by forest tent caterpillars, they stop feeding and perish approximately two to three days later. This product has been approved for use in Canada by Health Canada’s Pest Management Regulatory Agency, and will be used in accordance with federally approved label directions by licensed pesticide applicators.

Buffer zones

All buffer zones will be respected. Crews will ensure that the sprayer is not treating within 30 metres on each side of a registered property on the front street, side street, and rear lane.

Residents can apply for a 30-metre buffer zone in order to exempt their property during a forest tent caterpillar treatment program. Property owners not wanting insecticides applied on or adjacent to their principal residence may register as “Anti-Pesticide Registrants” for forest tent caterpillar control using Btk (*Bacillus thuringiensis* subspecies *kurstaki*). Those who wish to register must provide identification that ties the registrant to the address being registered for a buffer zone. A photocopy or scanned document like a driver’s licence, Manitoba Hydro, MTS or other utility bill will suffice as acceptable identification proving primary residence.

There are four different options to register:

- In writing to Insect Control Branch at 3 Grey Street, Winnipeg, MB R2L 1V2,
- Emailing 311 at 311@winnipeg.ca
- Faxing 311, and
- In person at 1539 Waverley Street.

A 72-hour turnaround time is required for processing.

Email notification

Citizens may register for email notification regarding adult mosquito and/or tree pest caterpillar control programs by visiting [City of Winnipeg – Insect Control Register for Notification](#). They can also register for telephone notification by calling 311 and leaving their name, address and phone number. Once registered, residents will receive automated phone or email notification identifying the area(s) of the City in which the Insect Control crews are intending to work, weather permitting.

More information

For more information contact 311, or visit [City of Winnipeg – Forest Tent Caterpillars](#).
