

# Lord Roberts Community Traffic Study

## Coming soon to your community

## Do you have something to say about traffic in your neighbourhood?

We want to hear it! Let's work together to identify traffic issues and solutions in the Lord Roberts neighbourhood.

Get involved!

- Sign up for project updates
- Apply to be on the public advisory committee
- Attend an upcoming public workshop
- Complete an upcoming online survey

For more information, visit: [winnipeg.ca/lordrobertstraffic](http://winnipeg.ca/lordrobertstraffic)

For inquiries or for those who require alternate formats to participate, please contact: [lordrobertstraffic@winnipeg.ca](mailto:lordrobertstraffic@winnipeg.ca) or 204-986-4243

### **Q: Why is the City conducting a community traffic study in Lord Roberts?**

A: The City recognizes the ongoing traffic issues in the Lord Roberts neighbourhood and will work collaboratively with the community to identify solutions. Some of the ongoing issues already identified by community members include increased traffic from new development, on-street parking, cut-through traffic, transit operations, and speeding.

### **Q: What is the study focused on? Will regional streets be considered as part of the study?**

A: The study focuses on non-regional streets within the Lord Roberts neighbourhood boundary. Issues on regional streets within the neighbourhood boundary that contribute to concerns on the non-regional streets may be identified through the study; however, improvements to the regional street network may need to be addressed through separate initiatives. Osborne Street and Jubilee Avenue are not included in the scope of this study.

### **Q: Will pedestrians and cyclist issues be included as part of the study?**

A: Active transportation experts will be part of the technical advisory committee. Traffic issues related to pedestrians and cyclist safety will be considered as part of this study.

### **Q: How do I get involved?**

A: You can get involved by applying to be part of the Public Advisory Committee. There will also be opportunities to participate by providing feedback in person and online throughout the study. Visit [winnipeg.ca/lordrobertstraffic](http://winnipeg.ca/lordrobertstraffic) for more information.
